Project-driven learner with practical experience applying cloud and DevOps concepts to build, automate, and manage infrastructure. Strong foundation in cloud architecture, networking, and deployment workflows, with a keen interest in solving infrastructure and operational challenges.

- KEY ACHIEVEMENTS -

AWS Cloud Infrastructure Deployment using Terraform, Docker and Jenkins

- Built an end-to-end cloud deployment workflow using containerization, Infrastructure as Code (IaC), and CI/CD principles.
 - Designed and managed AWS-based infrastructure while applying cloud architecture, networking, security, and monitoring best practices.
 - Automated deployment and system administration tasks to improve operational efficiency and consistency.
 - Completed hands-on implementation of cloud and DevOps concepts through practical, project-based learning.
-

- CORE SKILLS -

- AWS
- Linux
- Git
- Docker
- Terraform
- Kubernetes
- Ansible
- Jenkins/ GitHub Actions
- Prometheus, Grafana, CloudWatch
- Networking fundamentals
- MySQL, PostgreSQL

- EDUCATION -

Bachelor's in Computer Application
Beacon Institute of Technology, Meerut

Jun 2024- May 2027
